Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from *Geology of Victoria: A Descriptive Catalogue of the Specimens in the Industrial and Technological Museum (Melbourne), Illustrating the Rock System of Victoria* The descriptive catalogue of the specimens in the Industrial and Technological Museum, which now appears, originally formed part of the Report of the Museum, presented to Parliament in 1874. It is reprinted, with a view of making it more generally useful to the public. The collection of rocks native to Victoria which the catalogue describes, affords a very good opportunity of studying the rock systems of the country. The greatest care has been observed with reference to the locality of each specimen, and a great number have been placed aside as comparatively useless, because their identity with a particular district could not, with certainty, be stated. In the catalogue will be found explanatory notes on the character of the various specimens, their modes of occurrence and affinities, rendering the collection still more useful, and the catalogue not merely a hand-book to this collection, but a guide that can be used with great advantage in the formation of other collections throughout the country. The foreign rocks and minerals, carefully classified in the Museum, also afford an opportunity of comparison with those of Victoria, which must be interesting and valuable to all who are engaged in geological research. In his original report to the Trustees, Mr. Ulrich states that the nomenclature, system, and basis of classification adopted are according to the most approved recent views on Lithology by Dr. Zirkel, of Leipzig, Dr. Senft, von Gotta, and other authorities on the subject, though following mainly those given by Dr. Zirkel in his work on Petrography....
